

Apparently the FCC is considering striking down the New Jersey 'Do Not Call' registry. Please do not do so! Our law is more stringent than the federal registry because we WANT it to be. Just because telemarketers and/or businesses want to get into our homes for their own profit doesn't mean you have to allow them to do so. Any business with which I have an ongoing business relationship can call me, and that's all I want. I DON'T want businesses with which I have had a previous relationship - which has been discontinued - to call me.

PLEASE leave the New Jersey 'Do Not Call' registry alone!
